INCLINATOR[®] LX
HOME ELEVATORS

The luxury car that never leaves the home.

Increase your sales opportunities.

Homes with elevators attract a greater number of buyers – especially the aging Baby Boomers. Plus, this unique feature will differentiate your homes, as people are looking for special features for prestige and convenience.

Increase your profit.

The perceived value of an elevator in a home is so high – exceeding the actual cost – that builders can earn a mark-up of at least 30%. A certified Inclinator dealer will install the drive system and elevator, eliminating any need for training your own craftsmen.

The most customizable home elevator.

Inclinator elevators have the most design features and custom options. Each elevator is individually designed and hand-crafted in Inclinator's Pennsylvania factory. Today, there are more Inclinator elevators in homes across America than any other brand.

For new construction or renovation projects.

It's easy to add an elevator to your homes. An elevator shaftway is no more than stacked closets. Most elevators require only an 8-inch pit and eight-foot ceiling at top floor. Installation – by a certified Inclinator dealer – takes just a few days.
