

Areas designated for dealer customization / imprint

This area should be used for imprinting the dealer's logo and contact information

The luxury car that never leaves the home.

The most customizable home elevator.
Inclinator elevators have the most design features and custom options. Each elevator is individually designed and hand-crafted in Inclinator's Pennsylvania factory. Today, there are more Inclinator elevators in homes across America than any other brand.

Smoothest, quietest ride.
Our new INCLINATOR® LX features a permanent magnet motor and gearless traction drive – the most advanced home elevator technology. The result is a super smooth ride and virtually noiseless operation.

Environmentally-friendly operation.
Reduced energy consumption. Longer motor life cycle. No hydraulic or gear oil (no risk of soil contamination or smell). Machine roomless elevator takes up less square feet and reduces construction materials.

For new construction or renovation projects.
It's easy to add an elevator to your homes. An elevator shaftway is no more than stacked closets. Most elevators require only an 8-inch pit and eight-foot ceiling at top floor. Installation – by a certified Inclinator dealer – takes just a few days.

Learn more at www.inclinator.com or call your Certified Inclinator Dealer.

White block can be used for imprinting a mailing indicia or placement of a stamp

PDF file is print-ready and includes bleed and crop marks –
Size: 5.5" x 9"
CMYK, 300 resolution

This area should be used for imprinting or labeling of recipient's address

*Beautifully
designed.
Masterfully
engineered.*
