

Have you ever considered offering
Elevette®
home elevators
in the homes you design?

Remember when garage door openers were considered a luxury? Well today they are a necessity. The convenience offered by home elevators is becoming a necessity, too. And Elevette is the brand installed in more American homes than any other. Elevette is **the** household name in home elevators.

Comfort. Convenience. A home that's livable through the years.

The demand for home elevators is growing at more than 15% per year. Quite simply, homebuyers are demanding them and this creates an opportunity for you.

The ultimate in accessibility: Home elevators serve those with disabilities and many others, too. Every homeowner enjoys the ease of accessibility that a home elevator creates.

Truly unique homes: Elevette® home elevators offer you so many custom design options that you can create spectacular home designs. Want a transparent, shaftless elevator? No problem. What about teak with brass accents and three door openings? That's easy. Whatever you can envision, Inclinator can build.

It's easier than you think: A home elevator fits any multi-floor home and uses only a quarter of the space of a staircase. The elevator shaft is easy to create by stacking closets. Installation takes less than five days.

"Custom" is Standard with Inclinator

Inclinator handcrafts each Elevette® elevator so you can choose from options like door placement, interior wood finishes, handrails, lighting, gates and control plates.

An Elevette can be a centerpiece of your design.

Classic styling will complement any décor.

Special touches make each Elevette one-of-a-kind.

The Elevette is the next must-have home appliance

Improved livability: A home elevator makes it easier to move from floor to floor. It also makes a multi-story home more livable – even as people age.

Affordability and value: A home elevator costs homebuyers less than \$140 per month added to their mortgage payment. Plus, elevators can increase a home's resale value by 10%*.
